

Dear Affected Public,

You are receiving this letter to inform you of the location of our natural gas pipeline or natural gas facility that may be on your property or adjacent to your property. Facilities may appear similar to the pictures below. Enclosed is a scratch-n-sniff card that has five key points for natural gas safety.

The Cartersville Gas System is responsible for safely delivering natural gas to over 10,000 customers throughout Bartow County and the Dykes Creek area of Floyd County. We are committed to running a safe, reliable pipeline system. The National Transportation Safety Board has established that pipelines are the safest form of energy transportation, and incidents are rare. However, as part of our comprehensive safety program, we work closely with the communities along our pipeline to educate our neighbors about pipelines and pipeline safety. Our means of communication include public awareness meetings, Call-Before-You-Dig newspaper ads, and clear and visible natural gas pipeline markers.

If you have any questions about pipeline safety or would like to speak with The Cartersville Gas System, please give us a call at 770-387-5642.
